EXPERIENCE

Research Intern

University of Southern California, Lin Chen Biomolecular Sciences Lab

May 2018 – Ongoing Los Angeles, CA

- Built machine learning models in Python predicting the regulatory interaction of gene clusters and structural proteins.
- Analyzed interpretability of machine learning techniques such as neural nets in the context of computational biology.

Research Assistant

California Institute of Technology, Yuk Yung Planetary Sciences Lab

June 2019 – Sept 2020 Pasadena, CA

- Discovered potential planet-mass stellar-metallicity relationship using data from Kepler Space Telescope and Transiting Exoplanet Survey Satellite.
- Developed algorithm to compare mineral-ligand structural similarities in the context of origin of life.

Co-Founder/CTO

Nexpoints, LLC

June 2018 – Jan 2021 Pasadena, CA

- Developed app with Javascript libraries SurveyJS and React using machine learning and physician-informed medical insights to provide a preliminary health check tailored to the patient's symptoms. Available at nexpoints.com.
